

FOR IMMEDIATE RELEASE

Company Folders Goes Green with New Green Product Line

USA, Michigan, Keego Harbor, February 20, 2008

[Company Folders Inc.](#), has released a new line of products that are eco-friendly, giving businesses the opportunity to have the products they need for their business while being environmentally responsible.

Environmentally friendly binders are made from 100% post consumer recycled waste and use soy inks that are 13 – 18% soy with very low VOCs. The paper is FSC Certified and the mechanism of the binders can be made from metal or plastic and is available in ½” or ¾ “ sizes. In addition, each binder can be emblazoned with either the FSC-COC on-product label, Recycled Paper logo, Green Ink logo and/or the union label to showcase that your business is utilizing eco-friendly products.

Company Folders provides businesses with many options for going green. Their line of green folders can be made from 100% recycled materials for the most eco conscience companies. Also provided are folders which contain 30% post consumer waste. Like their other green products, inks that are soy based with extremely low VOC's is used to produce their folders. Depending on the paper selected, one of three FSC logo's can be printed on the folders to share with others that you are using environmentally products and that you care about the environment.

“Our new line of products enables businesses to advertise their company while being responsible about their impact on the environment. Providing businesses with the products they need, while using recycled materials and soy based inks, shows our commitment to our customers and the environment.” said Vladimir Gendelman, CEO of Company Folders, Inc.
